Street Closures and Traffic Impacts

November 27, 2024

CORPUS CHRISTI, TX—Below are street closures along major City streets that impact motorists and pedestrians. These closures may be due to construction, special event activity, or maintenance. All closures are subject to change due to weather, emergency work, or other circumstances.

Work zone safety is a priority. Motorists are advised to slow down, follow posted speed limits, pay attention, watch out for workers, obey signs and flaggers, and allow additional travel time for delays.

CITY STREET RECONSTRUCTION OR MAINTENANCE PROJECTS

Airline Road – McArdle Road to Ocean Drive

The Street Preventative Maintenance Program (SPMP) is working on Airline Road from McArdle Road to Ocean Drive. The work consists of milling and asphalt placement operations.

Airport Road – Morgan Avenue to Horne Road

In Phase 3 of the project, Airport Road will be closed entirely from just before the south entrance of the Corpus Christi State Living Center to just past the north entrance of Salinas Park.

Alameda Street – Louisiana Avenue to Texan Trail

The Alameda Street Project continues in Phase 1. The street reconstruction will close the southbound lanes on South Alameda Street from Louisiana Avenue to Texan Trail. During this project phase, traffic will be redirected to two-way, single-lane traffic within the northbound lanes.

Brownlee Boulevard – Staples Street to Morgan Avenue

Phase 1 of the Brownlee Boulevard project is underway. This first phase will involve a full closure of Brownlee Boulevard from Staples Street to Ayers Street, which will last through mid-December.

Comanche Street – Carancahua Street to North Alameda Street

The Comanche Street Project continues in Phases 3 and 4. The street reconstruction will result in the full closure of Comanche Street from North Alameda Street to North Staples Street. From North Staples Street to Artesan Street, traffic will be redirected to two-way, single-lane traffic within the eastbound lanes.

Everhart Road – Staples Street to South Alameda Street

The Everhart Road reconstruction project is in Phase 2A. The current Traffic Control Plan (TCP) will extend from Jacquelyn Drive to South Staples Street. The northbound lanes will be closed from South Staples Street to South Alameda Street. Traffic will be redirected to the southbound lanes, allowing two-way single-lane traffic. Two-way traffic will switch back to the northbound lanes from South Staples Street to McArdle Road. Additionally, the northbound lanes of South Staples Street will be closed on either side of Everhart Road. Left turns will be prohibited in all directions at the intersection of Everhart Road and South Staples Street.

Phase 1C is also in place and will extend the current Traffic Control Plan (TCP) from Burney Drive to the intersection at McArdle Road. The southbound lanes will be closed from South Staples Street to McArdle Road. Traffic will be redirected to the northbound lanes, allowing two-way single-lane traffic. Left turns onto McArdle Road from Everhart Road will be prohibited. Additionally, left turns onto Burney Drive from Everhart Road will be prohibited. Work will be done concurrently with Phase 1B and Phase 2.

Additional intermittent intersection closures will occur between South Padre Island Drive and South Alameda Street.

Flato Road – Bear Lane to Bates Road

The Flato Road Project continues in Phase 1. During this phase, Flato Road will be closed from the intersection of Bear Lane to the second driveway of West Oso High School.

Gollihar Road – Greenwood Drive to Crosstown Expressway

Phase 2 of the Gollihar Road project has begun. Gollihar Road will be partially closed on the eastbound lane from Bernadino Street to the Crosstown Expressway. Motorists will still have single-lane, two-way traffic.

The intersection of Prescott Street and the north side of Gollihar Road will be closed for two weeks beginning Tuesday, November 12.

Greenwood Drive — Saratoga Boulevard to Holly Road

The Street Preventative Maintenance Program (SPMP) is working on Greenwood Drive from South Padre Island Drive to Port Avenue. The first phase of the work will be on Greenwood Drive from South Padre Island Drive to Gollihar Road, which is expected to be completed by Tuesday, November 26. On Monday, December 2, crews will shift work to Greenwood Drive from Gollihar Road to Port Avenue, which is expected to be completed by mid-December. Lane closures will begin on the outside, northbound lane and continue lane by lane until each section is complete.

Lipes Boulevard – Sun Wood Drive to Staples Street

Lipes Boulevard between Sun Wood Drive and Clubgate Drive is closed to through traffic for construction.

McArdle Road – Kostoryz Road to Carroll Lane

The project is now in Phase 2. The contractor will switch traffic control on McArdle Road from Carroll Lane to Kostoryz Road to the eastbound lane to facilitate ongoing roadwork. The westbound lane, featuring newly completed concrete pavement, will be opened for one-way westbound traffic.

Oso Parkway – Bar-Le-Doc Drive

City Storm Water Maintenance crews will replace drainage infrastructure underneath Oso Parkway's drainage crossing. To perform maintenance repairs, city crews will set up a temporary full street closure of Oso Parkway. Message boards and construction signage will guide motorists around the closure. Residential access will not be affected by the temporary street closure.

CITY PERMITTED CLOSURES

Lomax Street – North Mesquite Street to North Chaparral Street

A contractor will have two 20-cubic-yard dumpsters on site for approximately 30 days. TAMUCC is renovating its first floor at Lomax Street & Chapparal Street. It requires the equipment to remove trash and debris accordingly.

John Sartain Street – North Chaparral Street to North Water Street N Water Street – Lomax Street to John Sartain Street N Chaparral Street – Lomax Street to John Sartain Street

A contractor will renovate the exterior fascia of the Education Service Center building in the 300 block of John Sartain Street, downtown Corpus Christi. The contractor will temporarily occupy the parking spaces along N Water Street, John Sartain Street, and N Chaparral Street adjacent to the building. Warning signs will advise motorists and pedestrians ahead of time regarding the construction. Construction at this location is expected to last several weeks.

Port Avenue – Horne Road to Baldwin Boulevard (Clark Pipeline) The contractor is replacing a 16-inch water main along South Port Avenue from Horne Road to Baldwin Boulevard. Construction has progressed into the next phase. However, Southbound Port Avenue will remain reduced to one lane between Baldwin Boulevard and Tarlton Street, utilizing the center turn lane as the travel lane. Northbound Port Avenue travel lanes will not be affected. In addition, other lane closures along the project limits may occur for lateral waterline installations. Construction at this location is estimated to last several months.

Port Avenue – Agnes Street to Lipan Street

A contractor for Corpus Christi Water Department (CCW) is making utility improvements along Port Avenue. To perform demolition operations safely, the contractor is implementing a temporary shoulder and sidewalk closure. Warning signs will advise motorists and pedestrians ahead of time regarding the construction. Construction at this location is expected to last several months.

Baldwin Boulevard – Lynch Street to SPID

A contractor for Corpus Christi Water Department (CCW) is making utility improvements along Baldwin Boulevard. To perform demolition operations safely, the contractor is implementing temporary lane closures between Lynch Street and SPID. Warning signs will advise motorists and pedestrians about the construction, which is expected to last several weeks.
